Citizenship: Argentinian and Italian
US Permanent resident & SSN

Profile

I have over twenty years of experience in software development. Working in both, face to face and virtual environments, I have covered several roles in which I was able to get adapted to the dynamics of the different changes in programming, offering to my employers the capacity and initiative of self-learning and on-the-job training. I have always strived to be able to meet the expectations of different customers and employers. I stopped working to be a full-time mother when my only daughter was around 2 years old. And three years ago, I started training, preparing myself in new technologies (.NET, Angular, Node.js) to enter the labor market again.

I was living in Argentina until now, and my family and I are relocating to the US, in the Reston area, in July. I have several letters of recommendation, from former bosses and colleagues available to send upon request.

My links

- Node.Js Website: https://resume-ccr.herokuapp.com/?user: guest?pass: 1234
- Angular Website: http://cvccr19.herokuapp.com/

Major Achievements

- Led the analysis, development, training and implementation of the Personnel Performance Evaluation system for the Public mining company of Chile, CODELCO, which had 17,000 employees at that time.

- As project manager, led a multidisciplinary team responsible for the banking website: **www.e-galicia.com**, the first bank website in Argentina.

Career Aspiration

After my maternity leave, it has been difficult to reinsert in the Argentina labor market. Having the opportunity to relocate to the US, I am really excited to get a job and add value to my new company. I am confident that my experience and skills can contribute to the organization success. It won't be easy but I am fully energized to continue my career in an US company.

Employment History

– <u>Freelance programmer Leader</u>   *Aug 11 – March 2015, and March 2021 until now*

My Major customer: IACA Laboratories. Bahia Blanca, Argentina. I developed, with Visualbasic language, programs to fulfill requirements of biologists and biochemists, for the Bioanalytical area. The programs took data from a XEVO TQ MS WATERS System and generated the reports to be shown in ANMAT, the national administration of medicines, food and medical technology of Argentina. Subsequent analysis and delivery of reports to ANMAT state organization. Trained in GLP (Good Laboratory Practices) work process and requirements. Worked with Visual Basic.

– <u>Advanced application programmer (Remote)</u>   *Mar 06 / Mar 11 (5 years)*

BA Technology. Bahía Blanca, Arg. CODELCO, the public mining company of Chile, had RHPro software. We had to customize the performance development module, to fit with CODELCO´s requirements. I was responsible for the requirements analysis and for the development. Later, I facilitated the training, including both Headquarters in Santiago Chile and a mine in El Salvador. Once project was completed, I was responsible for the maintenance of it. Worked with: ASP (VBScript), HTML, JavaScript, MS-Sql Server, Visual Studio.

– Assistant Programmer   *Mar 05 / Feb 06 (1 year)*

Solvay. Bahía Blanca, Arg. Temporary replacement of IT personnel in the HR Area. Main responsibilities were maintenance of database and macro developments in Visual Basic for Excel. This information was used for the performance development. Worked with: Visual Basic.

– WEB software developer (Remote)   *Jan 01 / Mar 05 (4,1 years)*

RHPRO (Heidt & Asociados). Buenos Aires, Arg. Application scheduler for INTRANET. Customization of an existing HR management system to meet customers' requirements. I worked remote from home, doing the customizations development and I traveled to Buenos Aires many times to do the analysis requirements, for example for Deloitte Argentina, Aceitera General Deheza, Cargill, Los Grobo, Farmacity among others. Worked with: ASP (VBScript), HTML, JavaScript, MS-Sql Server, Oracle, VisualStudio.

– WEB development Project Manager   *May 98 / Mar 01 (3 years)*

Technisys. Buenos Aires, Arg. Leader of WEB projects. Tasks consisted of interviews with clients, requirements analysis, planning, work team organization and also applications programming. In the 2000s with the emergence of web technology, I was able to lead the development many important websites like Fondos1784 (Bank Boston) and www.e-galicia.com (Galicia Bank). Worked with: ASP (VBScript), HTML, JavaScript, MS-Sql Server, Oracle, VisualStudio.

– Lieutenant – Data Computing Service   *Mar 96 / Apr 98 (2 years)*

Argentina Army. Bahía Blanca, Arg. Development of ammunition inventory stock control applications for the "Base de Apoyo Logistico (BAL)" military unit in Pigue. Worked with: Clarion programming language.

– Advanced application programmer (Remote)   *Jun 93 / Mar 96 (2,8 years)*

Systems Solutions. Buenos Aires, Arg. Senior programmer in the 4th generation Progress language, for installation, maintenance and customizations of the Magnus Datasul system. Programming in sequential Progress and afterward in version 7 and higher ones, consequently changing the paradigm to event-driven programming.

Develop and facilitate Progress 7 training, aimed to programmers who filled positions in Joinville (Brazil) and Canale and Danone (Argentina). I worked remote and traveled for implementations and tests at Mastellone, Quest International, Campo Frio and Elf Lubricants, among others. Worked with: Progress language and Progress4GL language.

– Assistant Professor   *Mar 92 / Dec 94 (2,7 years)*

Universidad Nacional del Sur. Bahía Blanca, Arg. Assistant Professor A (graduate) in the following courses: "Introduction to Computing", "Data Processing", "Algorithm Structures" and "Programming Languages".

Skills and Competences

- Build strong interpersonal relationships with Customers.
- Build a Customer experience approach to meet their needs.
- Be proactive and action-driven
- High ability to self-learning in new technologies.
- High experience in remote work.
- Be fully collaborative with team members.
- Build team purpose.
- Strong sense of pedagogy to deliver training.
- Highly committed to meet projects objectives
- Be diverse and innovative to approach problems.
- Well organized to track actions, timelines, and objectives.
- Diverse mindset to work in a multicultural environment.
- Effective communications to stakeholders.

Education and training

- Bachelor Degree in Computer Science (5-years college degree plus thesis). Universidad Nacional del Sur. 1984 – 1990
- Diploma in C # .NET. Sep 2018 - Dec 2018. UTN FRBA e-Learning Center
- Angular programming. Jun 2019 - Jul 2019. UTN FRBA e-Learning Center
- Node.Js programming. Oct 2019 - Nov 2019. UTN FRBA e-Learning Center
- Professional Webmaster (Node.js). March 2021-Sept 2021. UTN FRBA e-Learning Center
- IELTS Intensive preparative course. March 2021 -April 2021. www.ielts.org.ar
- Brighton Institute. March 2022. Currently attending.

Personal information

For family reasons, I resided, in 2008, three months in Baton Rouge, Louisiana, United States. In 2009 I lived for three months in Tarragona, Spain. In 2010, I lived for three months in Rayon, Thailand. In 2018, I spent one month in Houston, United States. Several of these travels gave me the opportunity to improve my English skills and exposed me to a personal relationship with people from different cultures.
